Hi All,

The deadline to finalize the MON has been extended to May 29, which includes a 30-day extension of the comment period (it now closes March 19). The comment period originally closed on February 18, but has since been reopened. We received a fair number of comments on February 18 because people didn't know about the extension. We're working to have those comments summarized by mid-March and will share the summaries and draft responses once we have them. In the meantime, I've attached the ACC EtO Panel's comments in case you're interested (the file ending in -1 is the main set of comments, the others are appendices). Kate is working through those comments and may have specific questions on them in the coming weeks. From the best I could tell, most other comments opposing the IRIS value duplicated ACC's comments.

I'll set up some time in the next few weeks so we can discuss the comments.

Thanks,
Matt
